

A General Look at Human Pheromones

Love has always intrigued many people and has most people baffled. Why you are attracted to certain people have a lot to do with the **human pheromones** that exist in just about every living thing on the planet.

Without these chemicals and elements released by the human body, a life long mate would be even more difficult to find than it is right now. There have been many studies on human nature and certain behaviors which have revealed that **pheromones** are the main cause of why we are drawn to someone, especially sexually.

Men and women have different pheromones and men are said to release most of theirs if they sweat. Both male and **female pheromones** are usually picked up from the olfactory senses of the opposite sex; however, there are studies that show which some of these sensory tend to be sensitive to the pheromones of the same sex.

- Perfumes and colognes are created with this type of reaction to take place by when putting it on.
- Many fragrances developed for women can attract the attention of men, mainly due to the ingredients used in all of them.

“

Buy Pheromones: The top 4 Pheromones Used by Men and Women Pheromones humans produce are nowhere near the strength of those created by animals. The study of the power behind these chemical compounds is astonishing. If people created the type of pheromones animals may, then men and women wouldn't ever have...

The insect and also animal kingdom rely more on pheromones than humans. human pheromones mostly are used for destination, while insects rely on the excreted chemicals for survival. They could use them to warn the swarm of predators and can alert a man or woman of readiness to mate. Without these very important excretions, survival of most insects would soon disappear.

The Animal World, They are Used for Just about the Same Reason They are in Humans

Attracting a breeding mate that will ensure the survival of species, including in humans. With a variety of species of animals, the pheromones are usually mixed with bright colors and crazy behaviors all in the name of bringing in a mate.

- To find out more about pheromones and perfumes, do a little research on line.
- More than likely right now, you are secreting pheromones or wearing cologne that has it in it.
