

Advantages of wearing Pheromone Products

Have you ever heard of **pheromone colognes** and perfumes? According to many of those that tried using those products, they said that these helped them in their efforts to attract the opposite sex. So how effective are **pheromone products** as an attractant?

Advantages of using **Pheromone** Products According to many scientists that study the effects of human pheromones, the main **pheromone advantage** of using such products is with its effectiveness as an attractant.

Although more commonly known among animals and insects, humans are also known to produce the same chemicals used by animals and insects to attract the opposite sex. And in accordance with those studies, several different hormones that the body excretes and secretes have such pheromones. One of those studied by scientists is the Axillary Steroids.

Human Pheromones There are three different Axillary Steroids that the **human body** creates that acts as pheromones. These are the Androstenol, Androstenone, and **Androstadienone**.

Androstenol is the Putative Woman Pheromone

In a study by Kirk-Smith, people wearing surgical masks treated with androstenol or untreated were shown pictures of people, animals and buildings and asked to rate the pictures on attractiveness. People with their masked treated with androstenol rated their pictures as being 'warmer' and 'more friendly'

Androstenone, on the other hand, are what men are using when detecting an ovulating woman. It is hypothesized that this may be a way for a male to discover a great ovulation female who would be more willingly to be associated with sexual interaction.

How to attract a girl: The secret behind hooking up with girls As the old adage goes, there are plenty of fish in the sea but guys, if you do not know how to build a girl you are literally dead in the water. Even before you depart the port, do have a plan for you are going to land a catch? Do you know what will...

- This pheromone is said to be only secreted by males being an attractant for women and is also thought to be a positive effector for their mood.
- Depending on where a female is in her menstrual cycle, the pheromones seem to have different effects on women.
- Another putative pheromone is androstadienone.
- This steroid seems to have an effect on the limbic system and causes a positive reaction in women, often improving their moods.

Using Pheromones as an Attractant Pheromones, based on those studies, play a vital role in bringing in the opposite sex for procreation, or for "one-night-stands". Because of this, many researchers have searched for ways on how to further increase this. This is when the number of diverse pheromone products was released in the market.

According to a lot of experts, some of the most effective pheromone goods are those that came from human pheromones, and the advantage of using this is that it increases a person's likeliness to attract the opposite sex through only pheromones.
