

# Why do we have chest locks and how to eliminate them?

**H**airs on our bodies have been inherited as a characteristic of mammals (animals that health professional their young kinds with milk). Hair is a key component to the existence and plays many important roles - heat and also defense coming from germs for example. Hair also helps reduce friction, and therefore irritation, in skin-to-skin make contact with, like under your armpits.

## To that Effect, We Also Have Torso Curly Hair on Our Bodies

Scientifically communicating, probably the most interesting part of torso curly hair, nonetheless, is actually to assist olfactory (relating in order to smell) communication. Scent or perhaps the body fragrance forms one of the most important forms of human-to-human communication. Your body produces chemicals called **pheromones** that impart you an original scent identity. Infant children can pick out their mother's blouse from a group of tops according to aroma alone. Consequently, a mother's pheromones can calm a baby regardless if mom is absent. Chest hair stores the unique chemical signature, allowing others to recognize your scent, feeling and respond to you.

Given the general notion that women prefer males with shaved chest and sculpted muscles, grooming and chest hair go hand-in-hand. Apparently, it helps in achieving a cleaner and trendier look. More often than not, there are swimmers with their chests shaved which gives these more speed because of much less drinking water resistance provided by the pool. This phenomenon is not restricted to swimmers alone; also man models shave to show away their bodies in a better way and sell products to the public on the covers of magazines and advertisements.

## The First Method for Chest Hair Removal is Totally Free

Shaving. You just need to have a good shaving cream and after shave and you can cut from the comfort of your own home. However, as it is often the least expensive method, it is also the most uncomfortable. Apart from discomfort from shaving, you will experience a serious itching when the chest hair starts growing back.

## Another Different Regarding Chest Hair Removal is Actually Waxing

Sure, unpleasant waxing! Using this method involves pouring hot wax on the desired area, next allowing it to cool down with a piece of cloth on top, and finally tearing from the cloth and wax along with the locks. On the surface, it seems very painful and dangerous, so no surprise that this is a method feared by most people, but it works wonders when you don't want to spend too much money and want to have a comfortable, itch-free post-hair-removal knowledge. You can wax yourself at home, or you can go to any salon or spa where they feature this service.

“ *Finally, one of the most effective ways to remove chest hair is with aesthetic laser treatments. Based on low pain incurred during the process and its higher effectiveness, Laserlight chest hair removal is by far the best way but this particular comes with a rather high price tag as well. Laser hair removal is often a medical procedure that makes use of laser light to remove unwanted hairs. The curly hair follicles from the location where the hairs start growing tend to be targeted by the laser beam consequently destroying these follicles immediately. Like treatment delays the re-growth of hairs. One session is not sufficient; normally 3-5 remedy periods are required to the smallest amount of.*
